This submittal checklist is intended to assist you in preparing and submitting a complete application. Once your application is determined to be counter complete, a review for technical completeness is conducted and you may be required to submit additional information in order to proceed with further review of your application.

Before You Apply for Your Project

- Decks not exceeding 200 square feet in area, that are not more than 30 inches above grade at any point, are not attached to a dwelling and do not serve the front door do not require a permit per IRC R105.2.
- Regardless if a building permit is required or not, you may still need approval from the planning department for shoreline, critical areas, steep slopes or zoning related restrictions.
- If the property is served by septic system, check with the Kitsap Public Health District at 360.728.2235 to identify the exact location of the property’s septic system components including all drainfield reserve areas.
- If you hire someone to build your deck, they must be a registered contractor—it’s the law in Washington State. To verify your contractor’s information, contact the Washington State Department of Labor and Industries. Phone: 360.415.4000; website: www.LNI.wa.gov).

Section 1 - Submittal Requirements
Use the column to the left to check off items included with your application.

<table>

</tbody>
</table>
|        | All residential additions or major remodel projects are required to have review and approval from Kitsap Public Health District 360.728.2235. The documentation to submit to PCD will be one of the following:  
  - Accepted or Concurrent Review BSA (Building Site Application)  
  - Accepted or Concurrent Review BC (Building Clearance)  
  - Accepted Building Clearance Exemption |
| B109   | 7. Residential Surface & Stormwater Management (SSWM) worksheet |

Fees are due at the time of submittal. Accepted forms of payment:

- Cash
- Check/Cashier's Check - Make checks payable to City of Bainbridge Island (COBI)
- Credit Cards: Discover, Visa, or MasterCard. A convenience fee will be assessed to each credit/debit card transaction.
### Section 2 – Technically Complete Details

Detailed application requirements are noted below.

<table>
<thead>
<tr>
<th>Code Requirement</th>
<th>Code Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>All wood must be pressure treated or of natural resistance to decay.</td>
<td>IRC R317.1</td>
</tr>
<tr>
<td>Fasteners, hangers, nails, etc, must be stainless steel, hot-dipped galvanized, or as specifically required for the specified wood preservative used.</td>
<td>IRC R317.3.1</td>
</tr>
<tr>
<td>Lateral connection is required to resist overturning (see attached for figure)</td>
<td>IRC R507.2.3</td>
</tr>
<tr>
<td>Ledger boards must be attached with lag screws or bolts with washers to the building and all connections between the deck and dwelling must be flashed with metal flashing.</td>
<td>IRC R507.2</td>
</tr>
<tr>
<td>Joists are of appropriate size to support imposed loads. The span of a joist is measured from the centerline of bearing at one end of the joist to the centerline of bearing at the other end of the joist and does not include length of the overhangs. Use Table 1 to determine joist span based on lumber size and joist spacing.</td>
<td>IRC R502.3</td>
</tr>
<tr>
<td>All decks, balconies or porches, open sides of landings and stairs which are more than 30&quot; above grade or a floor below must be protected by a guardrail not less than 36&quot; high (42&quot; for commercial or common areas of multi-family dwellings). Open guardrails and stair railings require intermediate rails or an ornamental pattern such that a ball 4&quot; in diameter cannot pass through.</td>
<td>IRC R312</td>
</tr>
<tr>
<td>Footings are of appropriate size to support imposed loads and extend a minimum of 12&quot; below grade. (see construction details for footing sizes)</td>
<td>IRC 403.1.4</td>
</tr>
<tr>
<td>Columns and posts exposed to the weather or to water splash must be supported by and connected to concrete piers or metal pedestals projecting above grade. Columns and posts in contact with the ground or embedded in concrete or masonry must be of special pressure treated wood approved for ground contact. Knee braces are required if the distance from grade to the top of the post exceeds 4'.</td>
<td>IRC R317.1.2</td>
</tr>
<tr>
<td>Positive connections required to secure posts to beams</td>
<td>IRC R502.9</td>
</tr>
<tr>
<td>Decks should not overhang beams by more than two feet, nor should beams overhang posts by more than a foot at the ends unless a specific design is calculated. Floor joist spacing at 24° on center requires 2x decking, and floor joist spacing at 16° on center requires 1x decking.</td>
<td>IRC R502.3</td>
</tr>
<tr>
<td>Deck stairs (exterior stairways) shall be provided with a source of illumination at the top landing, controlled from within the dwelling or by automatic means.</td>
<td>IRC R311.7.8</td>
</tr>
</tbody>
</table>

### Section 3 – Inspections

Inspectors visit the construction site during the project to make sure that it complies with building code requirements (see General Building Code Requirements, below). Most decks require a minimum of two inspections:

- **Footing Inspection**—Inspected after the holes are dug and rebar placed but prior to the pouring of concrete.
- **Framing Inspection**—Inspected after all framing, blocking and bracing are in place and prior to closing the construction so as to make it inaccessible for inspection. This inspection can be completed at the time of the final inspection if all parts of the framing will be visible and accessible at the final inspection.
- **Final inspection** to be made upon completion of the deck and finish grading.

The inspector may conduct one or more inspections during one visit if they can observe all work done. Additionally, the inspector may make or require other inspections to ascertain compliance with the provisions of the code.
Residential Deck Requirements

Drawing - page 1

NOTE:
For framing member sizes, see page 3.

Ledger, see details page 4
Joist hanger, see details 1&2 page 4

Joists
Decking
24" max. overhang

Joist spacing
Support post, see span table page 3
Post spacing
Post-to-beam connection see detail 3 page 5

Continuous solid 2x blocking between joists
Girder beam, see span table page 3
Footing, see page 2
24" maximum beam overhang

Typical Deck
Residential Deck Requirements

**Typical Deck Section**

- Existing building
- Flashing
- See details page 4
- Decking
- 1/4" spacing recommended for drainage
- 36" minimum high guard with intermediate rails spaced so that a sphere 4" in diameter cannot pass through. See Tip Sheet 3.
- Knee braces are required if distance from grade to top of post exceeds 4'. See detail page 5
- 4x4 posts min. w/ 8'-0" max. height
- Manufactured post base cast in footing
- 3,000 psi concrete (no special inspection required)
- Finished grade
- (2) #4 ea. way, 3" clear to bottom of footing. Footing to bear on undisturbed earth.

**NOTE:**
Pier blocks may be substituted for Type A footings. See page 3.

<td>18&quot; X 18&quot; X 12&quot;</td>
<td></td>
</tr>
</tbody>
</table>

*Footings sizes based on assumed soil bearing pressure of 2000 p.s.f. Contact your jurisdiction for additional restrictions.

### Deck Construction Connections

All fasteners, nails, bolts, screws, etc. must be corrosion resistant. See Deck Construction Note 3, page 1.

Follow manufacturer's instructions for timber connectors.

<table>
<thead>
<tr>
<th>Connections</th>
<th>Nailing</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Joist on deck beam; toenail each end</td>
<td>(3) 8d</td>
</tr>
<tr>
<td>2 Bridging or blocking to joist; toenail ea. side, ea. end</td>
<td>(3) 8d</td>
</tr>
<tr>
<td>3 2x decking to joist or deck beam; blind and face nail</td>
<td>(2) 16d</td>
</tr>
</tbody>
</table>
Residential Deck Requirements

Drawing - page 4

NOTE:
Refer to Deck Construction Note 3, page 1 for requirements on corrosion resistance.

 Ledger Section

1" min.

Deck joist

1" min.

Ledger to be same size as joist, minimum 2x6. Attach to existing rim joist per schedule on page 3

Spacing as listed in table on page 3.

Ledger Elevation
Residential Deck Requirements

Drawing - page 5

Knee Brace Detail

Alternate Knee Brace Detail:
2 x 4 knee brace face nailed ea. side of post and beam with 4 - 16d nails at each face and connection.

NOTE:
Knee braces are required if distance from grade to top of post exceeds 4 feet.

Secure ballusters
Solid blocking

Non-corrosive metal post/beam connector

Alternate Joist-to-Beam Condition

Non-corrosive metal post/beam connector

24" max.

Alternate Joist-to-Beam Condition

Corrosion resistant metal column cap.
Follow manufacturer’s installation instructions.

Beam splices to occur over posts with 1-1/2" min. bearing
Girder beam

4 x 4 knee brace

1/2" diameter lag bolt top & bottom (typical)
Pressure treated wood post

18" min.
Open guards on decks more than 30 inches above grade or floor below shall have members spaced so that a 4 inch diameter sphere cannot pass through.

**Stairway Notes:**
1. Stairways shall be not less than 36” in width.
2. Stairway risers shall be no greater than 7 3/4”.
3. Stairway treads shall have a minimum run of 10”.
4. The length of Run and the height of Riser shall not vary more than 3/8” in the run of the stair.
5. Stairs are required to be illuminated.
6. Open risers are permitted if the opening is less than 4”.
7. Tread nosing shall be not less than 3/4” but not more than 1-1/4” on stairways with solid risers. Except when treads are 11” or more.
8. Composite materials may require additional stringers.
