## Bainbridge Island, Washington

### **INTRODUCTION**

Design for Bainbridge (DforB) provides guidance for applicants to successfully navigate the design review process. The design review process, standards, and guidelines are structured to support good design and a deliberate design process from context and site down to design detailing. Design review is an iterative process intended to help applicants apply relevant standards and guidelines and develop designs for the project that fit Bainbridge Island and the unique context of the site. This iterative process contains three touch points with the Design Review Board (DRB). This worksheet is used to capture design information to be presented to the DRB at each step in the iterative process.

#### **#1 Conceptual Proposal Review Meeting**

The conceptual proposal review meeting is an informal meeting between the applicant and the Design Review Board to review site-specific conditions and contextual considerations for the design of development on site. This discussion is intended to inform strategies for site planning and massing that respond sensitively to the neighborhood context.

##### Applicant Submittal Requirements

- See DforB pages 12 & 16

#### **#2 Design Guidance Review Meeting**

Design guidance review meetings with the Design Review Board offer guidance to potential applicants during the design process on conceptual alternatives. The purpose of the design guidance review meeting is to review how the proposed alternatives fit the surrounding context with a focus on the development's program, uses, site plan, and massing. The DRB will also consider any requested departures, the rationale for those departures and their consistency with the intent and principles of the guidelines.

### **#3 Final Design Review Meeting**

At this meeting, the Board will review the application plans for compliance with Design Standards and Design Guidelines and ensure that the project reflects any revisions recommended by the Board at previous meetings. The Board will document its findings and transmit a written recommendation to the Planning Commission. The Board's recommendation may include conditions to ensure compliance with all standards.
