

Personal Care Products in Lodging Establishments Survey Responses

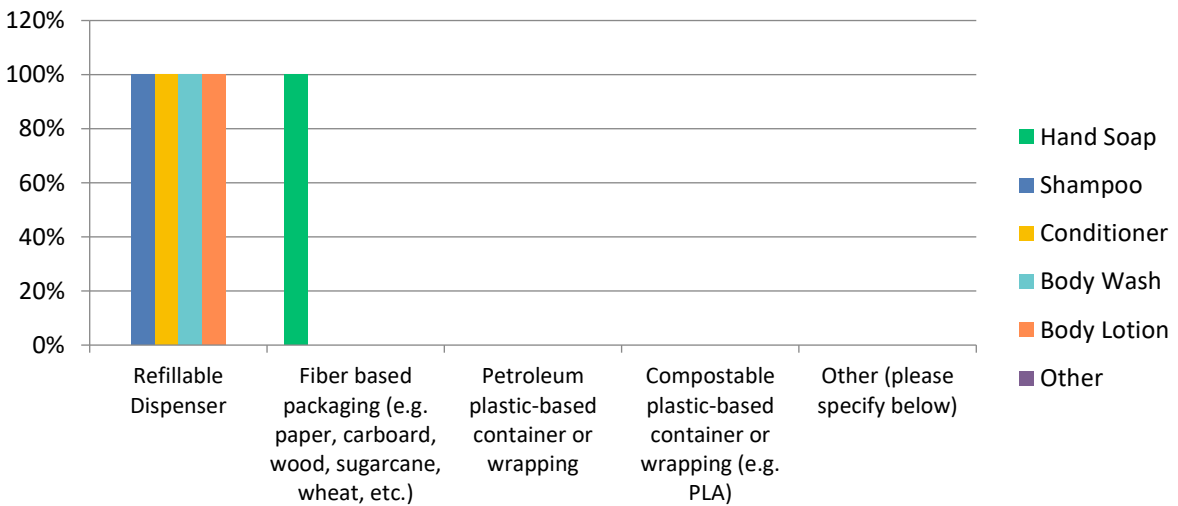

- Survey Data Collected for October 11-29
- Number of responses: 1

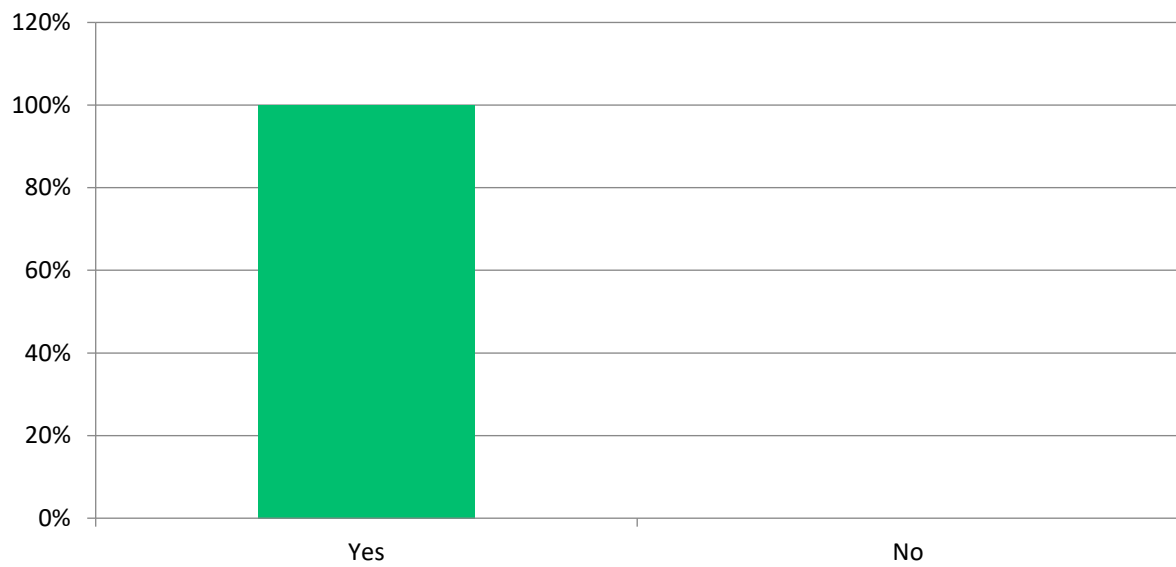

If you provide personal care products for guests, do you provide any of those products in single-use packaging (vs. refillable dispensers)?

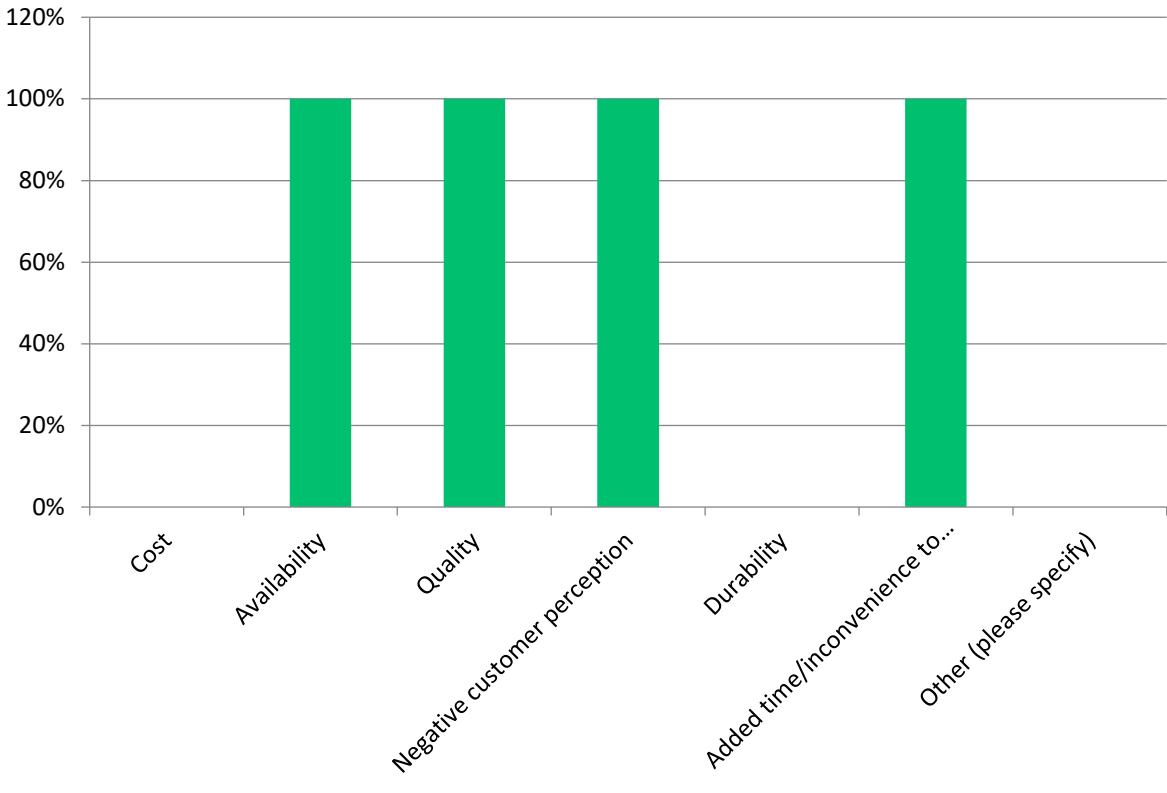

Please indicate which of the following personal care products you provide to guests and in what type of packaging.

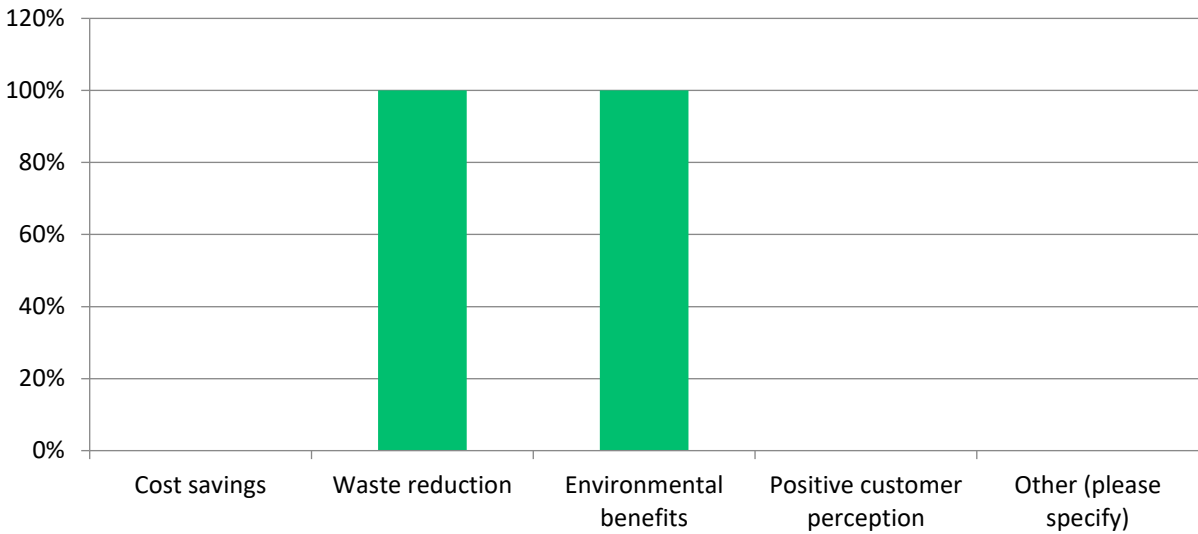

Are you aware that compostable plastic (e.g. PLA) cannot currently be composted on Bainbridge Island?

If the City of Bainbridge Island were to pass an ordinance requiring that personal care products must be distributed to guests in bulk refillable dispensers or in packaging that can be composted on Bainbridge Island (e.g. paper, cardboard, wood or fiber-b

What do you believe the potential benefits would be from eliminating or reducing the use of single use personal care products in your business? Please choose all that apply.

Would you be more interested in switching to refillable dispensers or compostable alternatives if any of the following support was made available to you?
