Glossary

Average Days to Maturity – A weighted average of the expiration dates for a portfolio's securities. An investment portfolio's volatility can be managed by shortening or lengthening the average maturity.

Certificates of Deposit – Also known as CDs, these are certificates issued against funds deposited in a bank for a definite period of time and earning a specified rate of return. Certificates of deposit bear rates of interest in line with money market rates at the time of issuance.

Discount Notes – Non-interest bearing securities issued at a discount and redeemed at maturity for the full face value (e.g., U.S. treasury bills).

Federal Agency Notes and Securities – A security issued by a federal agency or certain federally chartered entities (often referred to as government-sponsored enterprises or GSEs). Such notes typically are issued through dealers, mostly investment banking houses. While federal agency securities are backed directly by the U.S. government, GSEs carry only an implicit backing, and are not direct obligations of the U.S. Government. For this reason, these securities will typically offer a yield premium over U.S. Treasuries. Examples of GSE's are the National Mortgage Association (FNMA), the Federal Home Loan Bank System (FHLB), the Federal Farm Credit Bank System (FFCB), and the Federal Home Loan Mortgage Corporation (FHLMC).

Kitsap County Investment Pool – An investment option available to municipalities in Kitsap County who invest through the County Treasurer.

Repurchase Agreement (REPO) – A transaction where the seller (bank) agrees to buy back from the buyer (i.e., the City) securities at an agreed upon price after a stated period of time. The buyer in effect lends the seller money for the period of the agreement, and the terms of the agreement are structured to compensate the buyer for this.

Supranational – A multi-national organization whereby member nations transcend national boundaries or interests to share in the decision making to promote economic development in member countries.

U.S Treasury Obligations – Federally guaranteed obligations that are debt securities issued by the U.S. government and considered risk-free because they receive the full faith and credit of the federal government. These include Treasury bonds, notes, and bills.

Washington State Local Government Investment Pool (LGIP) – An investment option available to all Washington State agencies and local municipalities legally allowed to invest with the State Treasurer.
