

CITY OF  
BAINBRIDGE ISLAND

## Washington State Certified Backflow Assembly Testers

This list is provided to you, our water customer, as a courtesy and is not intended to be a recommendation or endorsement of any one firm. This list only includes firms that have provided information to document that they meet the following requirements:

1. City of Bainbridge Island Business License
2. Washington State Backflow Assembly Tester (BAT) Certification
3. Test Equipment Calibration Report
4. Washington State Business License
5. Verification of liability insurance

Test reports received by the City from firms not holding a current COBI business license or who have not provided us with copies of their BAT certification and test equipment calibration will not be processed.

**Note: This in no way precludes a water customer from using a firm not listed on this report.**

However, the firm will need to meet the requirements listed above before the City agrees the water customer has complied with the annual testing provisions of its Cross-Connection Control Program.

### CERTIFIED TESTERS

|                             |              |
